A Message to MD Family of Funds Investors

Dear MD Family of Funds Investor:

As part of our commitment to keeping you informed about your MD Fund investments, please find attached the 2023 Annual Management Report of Fund Performance (MRFP). If you also opted to receive the fund's financial statements, they are included in this package.

The annual MRFP is a regulatory document that supplements the annual financial statements. The document includes a brief discussion and analysis of the fund's investment activities, performance and financial highlights, as well as an explanation of how the markets and overall asset mix have affected the fund.

The report is produced on a fund-by-fund basis, and your report only includes information on the funds you owned as of December 31, 2023.

If you have any questions regarding these documents, please contact your MD Advisor or the MD Trade Centre at 1 800 267-2332.

We thank you for your continued investment in the MD Family of Funds.

MD Financial Management Inc. wholly owns or has a majority interest in the MD Group of Companies. It provides financial products and services, is the fund manager for the MD Family of Funds and offers investment counselling services. For a detailed list of the MD Group of Companies, visit md.ca.

Commissions, trailing commissions, management fees and expenses all may be associated with mutual fund investments. The rate of return is used only to illustrate the effects of the compound growth rate and is not intended to reflect future values of the mutual fund or returns on investment in the mutual fund. Standard performance data assumes reinvestment of distributions only and does not take into account sales, redemption, distribution or optional charges payable by any securityholder which would have reduced returns. Mutual funds are not guaranteed, their values change frequently and past performance may not be repeated. Please read the prospectus before investing. You may obtain a copy of the prospectus before investing by calling your MD Advisor or the MD Trade Centre at 1 800 267-2332.

MDPIM Strategic Yield Pool

Management Report of Fund Performance (December 31, 2023)

Investment Objectives and Strategies

The MDPIM Strategic Yield Pool (the "Fund") has an objective to provide income and long-term capital appreciation. The Fund invests primarily to obtain exposure to alternative or non-traditional asset classes or strategies that have a low correlation to traditional asset classes. The Fund invests primarily in equity securities, exchange traded funds (ETFs) listed on a Canadian or U.S. stock exchange and fixed income securities that emphasize alternative or non-traditional asset classes or strategies. The Fund also has exposure to currencies and commodities.

The Fund uses a top-down approach combined with tactical asset allocation and currency management to increase exposure to asset classes and currencies that the Investment Adviser believes to be the most favorable for achieving its investment objective depending on business conditions and market risk aversion. MDFM's process integrates quantitative investment models, global macro perspective, and qualitative fundamental analysis to seek diversification across multiple investment approaches and geographic perspectives. To develop those, we use economic data, risk factors and information in the derivatives markets to establish optimal portfolios depending on the investment cycle. A risk-budgeting optimization process provides a structure on the most efficient way to implement those views that incorporates volatility of each underlying asset, liquidity of the instrument, and costs in seeking to achieve the risk-adjusted return of the Fund.

The Fund may not invest in companies that manufacture tobacco or tobacco-related products or cannabis or cannabis related products.

Risk

This Fund is suitable as a core holding for an investor willing to accept a low to medium level of investment risk. This Fund is not suitable for an investor seeking a short-term investment.

Results of Operations

For the period ended December 31, 2023, the Fund had a total return of 7.3% (Series A).

What a difference a year makes. This time last year, U.S. Federal Reserve (Fed) Chairman Powell stated the Fed would 'stay the course' with interest rate hikes 'until the job [was] done.' While inflation was slowing, it was still elevated over 6%. Amid the uncertainty, a record number of CEOs said they expected a U.S. recession in 2023. Following that came bank stress, the debt ceiling and more geopolitical turmoil. Today, inflation across the developed world has since more than halved, all the while growth has remained resilient and the recession many fretted over never happened.

Investment grade and high yield credit spreads, as measured by ICE BofA Canadian and U.S. corporate indices OAS (Option-Adjusted Spread) rallied at the start of the year before widening during the bank crisis in March. As worries over contagion subsided, spreads drifted lower. The second half of the year saw spreads widen as the Israel/Gaza crisis unfolded before narrowing from November into the end of the year.

The MDPIM Strategic Yield Pool delivered strong returns over the year. The global exposure of the Pool detracted from returns as the Canadian Dollar appreciated relative to the US Dollar, however the currency impact was limited by the Pool's currency hedging strategy against the USD and benefitted from tactically trading the Canadian Dollar throughout the year.

With credit spreads tightening over the course of the year corporate bonds, both Investment Grade and High Yield, outperformed Government Bonds. Yields were volatile throughout the year, declining in the first half before moving up quickly in the fall with Central Banks maintaining a hawkish bias until inflation came in from its peak. Still yields ended the year higher leading to longer duration bonds underperforming relative to short duration bonds.

Tactical asset allocation added to the Pool's performance over the year mostly through overweight positions on corporate bonds and tactically adjusting the duration profile as yields fell and rose. Convertible Bonds were the strongest contributor to performance with a higher correlation to equities.

As at December 31, 2023, the total net asset value of the Fund was \$1.06 billion, an increase of 9% since the beginning of the year. The increase is due to net investment gain and net contributions, offset by income distributions to unitholders.

Recent Developments

STRATEGIC CHANGES

There have been no strategic changes and the Fund continues to be managed in a manner consistent with its investment mandate and is positioned to achieve its long-term objectives. The Investment Advisers have adhered to their investment disciplines and portfolio strategies.

Related Party Transactions

MD Financial Management Inc. is the Manager, Registrar and Trustee of the Fund. As Manager, MD Financial Management Inc. manages the overall business of the MD Family of Funds and the MDPIM Pools (collectively "the Funds") and is responsible for: setting investment objectives, providing and/or retaining the services of third party service providers for fund accounting services, administration services, and promoting the sales of the Fund's units.

The Manager is a wholly-owned subsidiary of The Bank of Nova Scotia (Scotiabank).

1832 Asset Management LP, a subsidiary of Scotiabank, is the portfolio manager of the Funds. MD Financial Management Inc., as Manager, continues to have overall responsibility for the management of the Funds. MD Financial Management Inc. is the registered portfolio manager and provides the discretionary portfolio management services to managed-account clients through MD Private Investment Counsel. 1832 Asset Management LP is responsible for the overall performance of the Funds, the management of fund assets and the selection and monitoring of the Funds' sub-advisors.

The Manager, on behalf of the Fund, may enter into transactions or arrangements with other members of Scotiabank or certain other companies that are related or connected to the Manager (each a "related party"). All transactions between the Fund and the related parties are in the normal course of business and are carried out at arm's length terms.

As Registrar, MD Financial Management Inc. keeps track of the owners of units of the MDPIM Pools, processes purchase, transfer and redemption orders, issues investor account statements, and issues annual tax reporting information.

MDPIM Strategic Yield Pool

Management Report of Fund Performance (December 31, 2023)

As the Fund is organized as a Trust, investing in the Fund means purchasing units of the Trust. As Trustee to the Fund, MD Financial Management Inc. holds actual title to the property in the Fund—the cash and securities the Fund invests in—on behalf of the unitholders.

Units of the MDPIM Pools are only available to clients of MD Private Trust Company or discretionary managed account clients of MD Financial Management Inc. MD Management Limited ceased to be the principal distributor of the MDPIM Pools as effective October 29, 2018.

INDEPENDENT REVIEW COMMITTEE

The Manager has established an independent review committee (the “IRC”) in accordance with National Instrument 81-107 – Independent Review Committee for Investment Funds (“NI 81-107”) with a mandate to review and provide recommendations or approval, as required, on conflict of interest matters referred to it by the Manager on behalf of the Fund. The IRC is responsible for overseeing the Manager’s decisions in situations where the Manager is faced with any present or perceived conflicts of interest, all in accordance with NI 81-107.

The IRC may also approve certain mergers between the Fund and other funds and any change of the auditor of the Fund. Subject to any corporate and securities law requirements, no securityholder approval will be obtained in such circumstances, but you will be sent a written notice at least 60 days before the effective date of any such transaction or change of auditor. In certain circumstances, securityholder approval may be required to approve certain mergers.

The IRC has four members: Stephen J. Griggs (Chair), Heather A.T. Hunter, Jennifer L. Witterick and Steven Donald each of whom is independent of the Manager.

The IRC prepares and files a report to the securityholders each fiscal year that describes the IRC and its activities for securityholders, as well as contains a complete list of the standing instructions. These standing instructions enable the Manager to act in a particular conflict of interest matter on a continuing basis provided the Manager complies with its policies and procedures established to address that conflict of interest matter and reports periodically to the IRC on the matter. This report to the securityholders is available on the Manager’s website or, at no cost, by contacting the Manager.

The compensation and other reasonable expenses of the IRC will be paid out of the assets of the Fund as well as out of the assets of the other investment funds for which the IRC may act as the independent review committee. The compensation for the IRC is an annual flat fee. Expenses of the IRC may include premiums for insurance coverage, travel expenses and reasonable out-of-pocket expenses.

The Manager is required to advise the IRC of any breach of a condition of any standing instructions. The standing instructions require, among other things, that the investment decision in respect to a related party transaction: (a) is made by the Manager free from any influence by an entity related to the Manager and without taking into account any consideration to any associate or affiliate of the Manager; (b) represents the business judgment of the Manager uninfluenced by considerations other than the best interests of the Fund; and (c) is made in compliance with the Manager’s written policies and procedures. Transactions made by the Manager under the standing instructions are subsequently reviewed by the IRC to monitor compliance.

The Manager, in respect of its management of the Fund relied on IRC standing instructions regarding related party transactions as set out below:

- Paying brokerage commissions and spreads to a related party for effecting security transactions on an principal basis on behalf of the Fund;
- Purchases or sales of securities of an issuer from or to another investment fund managed by the Manager;
- Investments in the securities of issuers for which a related underwriter acted as an underwriter during the distribution of such securities and the 60-day period following the completion of such distribution;
- Purchases of securities of a related party;
- Investment Advisor Monitoring and Oversight

Management Fees

MD Financial Management Inc. provides the Fund with management and administrative services. No management fee is charged in respect of units of the Fund. Investors in these units have agreed to pay a managed account fee directly to MD Financial Management Inc.

The Fund invests a large proportion of its assets in ETFs, which are managed by parties unrelated to MD Financial Management Inc. Because those ETFs pay their managers a management fee and bear certain operating costs, the management expense ratio (“MER”) for the Fund includes the fees and expenses of those ETFs.

Past Performance

The following bar chart shows the Fund’s annual performance for each of the years shown, and illustrates how the Fund’s performance changed from year to year. The chart shows, in percentage terms, how much an investment made on the first day of each calendar year would have grown or decreased by the last day of each calendar year.

The performance information assumes that all distributions made by the Fund were reinvested in additional units of the Fund and does not take into account sales, redemption, distribution or other optional charges that would reduce returns. How the Fund has performed in the past does not necessarily indicate how the Fund will perform in the future.

YEAR-BY-YEAR RETURNS

Management uses the Blended Composite Index as the benchmark for this portfolio because it best represents the nature of the overall fund. Although index returns are hypothetical—as they do not reflect the true cost of owning or managing the underlying securities— they are one of several useful indicators. By comparing the Fund's performance to the movements of the benchmark, we are able to assess how the Fund is doing. For example, some short-term deviations can signal the need for change while others confirm the expectations of a longer-term strategy. If management were to ascertain that a fund's over- or underperformance was the result of excessive risk-taking or deviation from the investment mandate, we would, on behalf of all our unitholders, address these issues with the Investment Advisers, and make changes if necessary.

The Pool outperformed its benchmark over the year, due to higher allocations to Convertible and High Yield bonds.

Regarding Forward-Looking Statements

This document contains forward-looking statements. Such statements are generally identifiable by the terminology used, such as "plan", "anticipate", "intend", "expect", "estimate", or other similar wording.

These forward-looking statements are subject to known and unknown risks and uncertainties and other factors which may cause actual results, levels of activity and achievements to differ materially from those expressed or implied by such statements. Such factors include, but are not limited to: general economic, market and business conditions; fluctuations in securities prices; fluctuation in interest rates and foreign currency exchange rates; and actions by governmental authorities. Future events and their effects on the Fund may not be those anticipated. Actual results may differ materially from the results anticipated in these forward-looking statements.

¹ This information is derived from the Fund's audited annual financial statements.

² Net assets and distributions are based on the actual number of units outstanding at the relevant time. The increase (decrease) from operations is based on the weighted average number of units outstanding over the financial year. This table is not intended to be a reconciliation of beginning to ending net assets per unit.

³ Distributions were paid in cash or reinvested in additional units of the Fund, or both.

¹ This information is provided as at December 31 of the year shown.

² The management expense ratio ("MER") is based on total expenses for the stated period (excluding commissions, withholding taxes and other portfolio transaction costs) and the Fund's proportionate share of the MER, if applicable, of exchange traded funds ("ETFs") in which the Fund has invested, expressed as an annualized percentage of daily average net asset value during the period.

³ The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net assets during the period.

⁴ The Fund's portfolio turnover rate indicates how actively the Fund's portfolio advisor manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the year. The higher a fund's portfolio turnover rate in a year, the greater the trading costs payable by the fund in the year, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover rate and the performance of a fund.
