## Management Report of Fund Performance (June 30, 2023)

---

### Results of Operations

For the period ended June 30, 2023, the Fund had total returns of 4.6% (Series A), 5.4% (Series I), 5.1% (Series F), and 4.8% (Series D).

The Canadian equity market ended the 6-month period in positive territory as the S&P/TSX Composite Index returned 5.7%. The major theme for the first half of 2023 was combating inflation by the central bank.

In June we witnessed inflation dip to 2.8%, a significant fall from the 6.3% at the end of 2022 and the 8.1% from 1-year prior. The slowdown was largely attributed to a decline in gasoline prices and an ease in supply chain bottlenecks. The result was in line with the Bank of Canada's (BoC) baseline scenario that inflation will slow to the 3% mark by summer, raising doubts over the extent of rate hikes left in its tightening campaign. At the end of June, the BoC has raised interest rates twice, closing at 4.75% - hitting a 15-year high in Canada. Though, it has not reached its target inflation rate of 2% the central bank has hinted it is not done raising interest rates.

Against this backdrop, consumers got relief at the gas pumps as oil prices declined from \$80 U.S. dollars to around \$71 U.S. dollars per barrel. GDP growth rebounded to positive territory in the first quarter to 0.8% after remaining flat in the fourth quarter of 2022. The pause in rates alleviated Canada's housing market in making a strong recovery as home prices rose higher than what they were at this same time last year - it is the first time the housing market has seen a positive increase in prices on an annual basis.

Ten of the 11 GICS (Global Industry Classification Standard) sectors posted positive returns over the 6-month period. The best performing sectors were Information Technology (47.5%), Consumer Discretionary (+11.3%), and Industrials (+8.7%). The worst performing sectors were Energy (-2.3%), Materials (0.6%), and Health Care (1.3%).

Over the period, the Canadian dollar strengthened against most major currencies including the Euro currency, Japanese yen and the U.S. dollar.

Consistent with its focused investment mandate, the Fund held a higher allocation to higher yielding companies as a contributing factor to meeting its elevated yield objective versus the S&P/TSX Capped Composite Index.

Out of the eleven GICS sectors represented in the Fund, the Financials and Energy sectors retained, on average, the highest portfolio weightings, while Materials, Consumer Discretionary, and Health Care received the lowest allocation. All sectors, save the Consumer Staples and Health Care sectors, contributed positively to Fund performance over the first half of 2023.

The Fund maintained an average exposure of 8.7% to companies domiciled outside of Canada. This geographical allocation detracted from Fund performance in the first half of the year.

The Fund's active multi-manager structure combines complementary investment approaches. The style was consistently maintained throughout the period. The portfolio is actively managed, with positions altered based on relative opportunities, there were no material shifts in sector positions within the portfolio.

As at June 30, 2023, the total net asset value of the Fund was \$234.14 million, an increase of 1% since the beginning of the year. The increase is due to net investment gain, offset by net redemptions and income distributions to unitholders.

#### INDEPENDENT REVIEW COMMITTEE

The Manager has established an independent review committee (the "IRC") in accordance with National Instrument 81-107 – Independent Review Committee for Investment Funds ("NI 81-107") with a mandate to review and provide recommendations or approval, as required, on conflict of interest matters referred to it by the Manager on behalf of the Fund. The IRC is responsible for overseeing the Manager's decisions in situations where the Manager is faced with any present or perceived conflicts of interest, all in accordance with NI 81-107.

## Management Report of Fund Performance (June 30, 2023)

The IRC may also approve certain mergers between the Fund and other funds and any change of the auditor of the Fund. Subject to any corporate and securities law requirements, no securityholder approval will be obtained in such circumstances, but you will be sent a written notice at least 60 days before the effective date of any such transaction or change of auditor. In certain circumstances, securityholder approval may be required to approve certain mergers.

The IRC has five members: Stephen J. Griggs (Chair), Simon Hitzig, Heather A.T. Hunter, Jennifer L. Witterick and Steven Donald each of whom is independent of the Manager.

The IRC prepares and files a report to the securityholders each fiscal year that describes the IRC and its activities for securityholders, as well as contains a complete list of the standing instructions. These standing instructions enable the Manager to act in a particular conflict of interest matter on a continuing basis provided the Manager complies with its policies and procedures established to address that conflict of interest matter and reports periodically to the IRC on the matter. This report to the securityholders is available on the Manager's website or, at no cost, by contacting the Manager.

The compensation and other reasonable expenses of the IRC will be paid out of the assets of the Fund as well as out of the assets of the other investment funds for which the IRC may act as the independent review committee. The compensation for the IRC is an annual flat fee. Expenses of the IRC may include premiums for insurance coverage, travel expenses and reasonable out-of-pocket expenses.

The Manager is required to advise the IRC of any breach of a condition of any standing instructions. The standing instructions require, among other things, that the investment decision in respect to a related party transaction: (a) is made by the Manager free from any influence by an entity related to the Manager and without taking into account any consideration to any associate or affiliate of the Manager; (b) represents the business judgment of the Manager uninfluenced by considerations other than the best interests of the Fund; and (c) is made in compliance with the Manager's written policies and procedures. Transactions made by the Manager under the standing instructions are subsequently reviewed by the IRC to monitor compliance.

The Manager, in respect of its management of the Fund relied on IRC standing instructions regarding related party transactions as set out below:

- Paying brokerage commissions and spreads to a related party for effecting security transactions on a principal basis on behalf of the Fund;
- Purchases or sales of securities of an issuer from or to another investment fund managed by the Manager;
- Investments in the securities of issuers for which a related underwriter acted as an underwriter during the distribution of such securities and the 60-day period following the completion of such distribution;
- Purchases of securities of a related party;
- Investment Advisor Monitoring and Oversight

## Past Performance

The following bar chart shows the Fund's annual performance for each of the years shown, and illustrates how the Fund's performance changed from year to year. The chart shows, in percentage terms, how much an investment made on the first day of each calendar year would have grown or decreased by the last day of each calendar year.

The performance information assumes that all distributions made by the Fund were reinvested in additional units of the Fund and does not take into account sales, redemption, distribution or other optional charges that would reduce returns. How the Fund has performed in the past does not necessarily indicate how the Fund will perform in the future.

<sup>1</sup> This information is provided as at June 30 or December 31 of the period shown.

<sup>2</sup> The management expense ratio ("MER") is based on total expenses for the stated period (excluding commissions, withholding taxes and other portfolio transaction costs) and the Fund's proportionate share of the MER, if applicable, of exchange traded funds ("ETFs") in which the Fund has invested, expressed as an annualized percentage of daily average net asset value during the period.

<sup>3</sup> The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net assets during the period.

<sup>4</sup> The Fund's portfolio turnover rate indicates how actively the Fund's portfolio advisor manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the year. The higher a fund's portfolio turnover rate in a year, the greater the trading costs payable by the fund in the year, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover rate and the performance of a fund.

<sup>5</sup> The results shown are for the period June 26, 2018 - December 31, 2018.
